Journal of Fluid Mechanics **Volume 363 25 May 1998**

P. Luchini & A. Bottaro Görtler vortices: a backward-in-time approach to the receptivity problem *page* 1

M. K. Lyon & L. G. Leal An experimental study of the motion of concentrated suspensions in two-dimensional channel flow. Part 1. Monodisperse systems 25

M. K. Lyon & L. G. Leal An experimental study of the motion of concentrated suspensions in two-dimensional channel flow. Part 2. Bidisperse systems 57

A. H. Techet, F. S. Hover & M. S. Triantafyllou Vortical patterns behind a tapered cylinder oscillating transversely to a uniform flow 79

F. S. Hover, A. H. Techet & M. S. Triantafyllou Forces on oscillating uniform and tapered cylinders in crossflow 97

D. B. Goldstein & T.-C. Tuan Secondary flow induced by riblets 115

J. Tang & H. H. Bau Experiments on the stabilization of the no-motion state of a fluid layer heated from below and cooled from above 153

J. Panda Shock oscillation in underexpanded screeching jets 173

A. Prochazka & D. I. Pullin Structure and stability of non-symmetric Burgers vortices 199

G. F. Lane-Serff & P. G. Baines Eddy formation by dense flows on slopes in a rotating fluid 229

X. Y. Luo & T. J. Pedley The effects of wall inertia on flow in a two-dimensional collapsible channel 253

R. Nicodemus, S. Grossmann & M. Holthaus The background flow method. Part 1. Constructive approach to bounds on energy dissipation 281

R. Nicodemus, S. Grossmann & M. Holthaus The background flow method. Part 2. Asymptotic theory of dissipation bounds 301

G. Sposito A note on helicity conservation in steady fluid flows 325

R. A. Smith An operator expansion formalism for nonlinear surface waves over variable depth 333

BOOK REVIEWS

Wave Flow of Liquid Films, by S. V. Alekseenko, V. E. Nakoryakov & B. G. Pokusaev 348

Numerical Solution of Partial Differential Equations, by K. W. Morton & D. F. Mayers 349
